Skills

Languages: JavaScript

Frontend: React.js | Next.js | Tailwind CSS | HTML5 | CSS3

Backend: Node.js | Express.js | REST API Design | JWT & OAuth Authentication

Database: MongoDB (Schema Design)

Tools & Platforms: Git | GitHub | Firebase | Vercel | Render | Railway | VS Code | Vite

Soft Skills: Problem Solving | Communication | Adaptability | Fast Learner

Education

Dhaka Central University

BSc in Chemistry

January 2022 – Present

3rd Year Running

Achievements & Problem Solving

LeetCode: Solved 12+ problems in JavaScript and actively practising Data Structures & Algorithms [LeetCode](#)

Featured Projects

SportNest – Sports Facility Booking Platform

[Live Link](#) | [Client](#) | [Server](#)

- Built a full-stack sports facility booking platform where users search, filter, and book facilities by date and time slot, while owners list and manage their own listings.
- Implemented JWT stored in an HttpOnly cookie, verified via Express middleware, keeping private routes authenticated across page reloads; designed a normalized MongoDB schema (Facility, Booking, User) for fast queries.
- **Tech:** Next.js | React.js | Node.js | Express.js | MongoDB | JWT | Better Auth | Tailwind CSS | Framer Motion

SkillSphere – Online Learning Platform

[Live Link](#) | [GitHub](#)

- Developed a responsive online learning platform with a component-based architecture and reusable, dynamic content rendering.
- Deployed on Vercel with a structured, SSR-ready Next.js application setup.
- **Tech:** Next.js | React.js | JavaScript | HTML5 | CSS3

Personal Portfolio Website

[Live Link](#) | [GitHub](#)

- Designed and built a fully responsive personal portfolio from scratch using vanilla HTML, CSS, and JavaScript – no framework – with a custom cursor and smooth section transitions.
- Deployed on a custom domain with SEO and Open Graph optimization for discoverability.
- **Tech:** HTML5 | CSS3 | JavaScript

NexaFlow – Workflow Management Web App

[Live Link](#) | [GitHub](#)

- Built a productivity and workflow management web app with a component-based Next.js/React architecture, focused on clean task organization and a minimal UX.
- Deployed on Netlify with continuous delivery from GitHub.
- **Tech:** Next.js | React.js | Tailwind CSS
